## PROFILE

I am a freelance Web Developer with a focus in fronted development with CSS, SCSS, Bootstrap, JS, JQuery, and React. My dream is to be able to work for some of the best tech companies in the world, and make difference in the world using technology. I'm constantly learning new things, and currently those things include gaining more experience with React-native, Angular. When I'm not learning something new, chances are I'm picking up my camera and wondering the world.

## EMPLOYMENT HISTORY

### Sales Rep, AT&T

Orlando, FL

Oct 2013 — Present

Helping motivating my peers & company reach success.

Selling products and services using solid arguments to prospective customers.

Maintaining positive business relationships to ensure future sales.

### Sales Rep, Apple

Miami Beach, FL

Jun 2012 — Oct 2013

Able to provide the best customer focus.

Finding a unique and complete solution for each customer.

Mentoring my fellow peers to drive for results.

## EDUCATION

### Full Stack Web Development Bootcamp, University of Central Florida

Orlando, FL

Dec 2019 — Jun 2020

Full stack developer boot-camp is were I developed valuable skills necessary to become proficient in front-end and back-end development technologies.

## PROJECTS

### Nektur

May 2021 — Present

In this MERN Stack application I worked on is a social media platform that allows all developers connect with each other. Some of the Technologies that I used is JSON Web token for the authentication, Bcrypt Password Hashing, React hooks. MongoDB(Atlas), and Heroku & Git deployment.

### Audio Engineer Portfolio

Feb 2021 — Present

This is a front-end portfolio I created for a client. Building this site I used Scss, and JS for the type writer style on the landing page.
